

## **INFORMATION SHEET – MONDAY 11<sup>th</sup> DECEMBER 2023**

### **Careers Information**

#### **Jobs available at the Huntingtower Hotel over the festive period**

The Huntingtower Hotel is located fairly close to the school, and it is currently seeking young people aged 16+ who may be interested in a hospitality job over the festive period. If you are interested – the job would be in the hotel's food and beverage section – contact Bryony McLanaghan, the hotel's Operations Manager on 01738 583771 or email her at: [bryony\\_mclanaghan@leonardohotels.co.uk](mailto:bryony_mclanaghan@leonardohotels.co.uk)

#### **A career in Economics**

The Scottish Government's Economist Group seeks to promote awareness of Economics in secondary schools. If you wish to attend an online career insight session (lasting roughly a period) speak with Mr. Letford in room 19A.

#### **Attention budding Agricultural Engineers**

Are you interested in becoming an Agricultural Engineer? A local company with branches around Scotland is considering offering a young person a work experience placement with a view to potentially offering them an apprenticeship next summer. The business stresses that the young person must have a genuine interest/appreciation of the rural economy and farming matters in particular. This is an important attribute. If interested, contact Mr. Letford ASAP.

#### **Apprenticeship Fair next spring – a heads up**

After the success of last year's Apprenticeship Fair held at the Salutation Hotel, another one will be held next spring at the same venue.

This is for ALL pupils interested in gaining an apprenticeship of whatever variety and includes companies from a wide range of industries all offering Foundation Apprenticeships, Modern Apprenticeships and Graduate Apprenticeships.

#### **Free In2STEM online programme**

This programme is for 16-19-year-olds (S5/S6/college) from less advantaged backgrounds interested in exploring a career in STEM. The programme consists of mentoring sessions with a STEM expert who is working in the student's aspirational field, research courses focused on cutting-edge research, careers, and employability workshops and competitions.

In2STEM Online takes place completely online between July 22 and August 23, 2024, and requires an approximate time commitment of 15 to 20 hours, spread over the summer based on student availability.

For more information, please email the In2STEM team at [students@in2scienceuk.org](mailto:students@in2scienceuk.org)
